

Jerome Manzano

Cross-platform Developer

Relevant Experience

C# Developer @ Happen Space

May 2022 – Nov 2022 // Remote / Bangkok City, Thailand

- Designed and developed an online event platform that runs on web browsers, desktops and mobile devices
- Set up push notifications for mobile devices using Firebase Messaging
- Conducted research on tools, frameworks, and libraries to provide valuable insights into their capabilities and limitations

Senior C# Developer @ Mailbird

Jan 2021 – Apr 2022 // Remote / California, USA

- Implemented new features and fixed bugs on a desktop email client
- Helped improve unit test coverage by up to 85%
- Worked closely with other developers to ensure high code quality through testing and code reviews

Software Developer @ Nerv

Mar 2019 – Sep 2020 // Remote / Singapore

- Designed and developed a cross-platform messaging application that integrates peer-to-peer blockchain-based payments
- Helped with the transition when the product pivoted into a collaboration platform by providing strategies on how to reuse existing features
- Reviewed and provided feedback for coding challenges of new applicants

Senior Software Developer @ Get Devs

Aug 2018 – Mar 2019 // Makati City, Philippines

- Architected and implemented Clarity, a voice-based clinical support tool used for the early detection and monitoring of mental health and suicidal risk
- Wrote the coding standard and guidelines for developing mobile applications using Xamarin for an IT consulting client

Professional Mobile Applications Developer @ ERNI

Sep 2017– Aug 2018 // Mandaluyong City, Philippines

- Engineered and developed an interactive learning application that runs on iOS
- Designed and developed an in-house event managing application for a global medical device company

Lead Software Engineer / Onsite Representative @ Pointwest

Dec 2011 – Sep 2017 // Quezone City, Philippines

- Lead a team of 6 software engineers that developed the first RFID baggage tracking application for US airlines
- Pioneered Xamarin research and development within the company
- Served as primary liaison between our client from the US and the offshore team in the Philippines
- Analyzed, designed, and estimated solutions based on business requirements provided
